#### ALLIED BANK LIMITED CAPITAL ADEQUACY AND LIQUIDITY DISCLOSURES - UNCONSOLIDATED AS AT DECEMBER 31, 2021

## 1 CAPITAL ASSESSMENT AND ADEQUACY

### 1.1 Capital Adequacy

### 1.1.1 Objectives of Managing Capital

Capital Management aims to ensure that there is sufficient capital to meet the capital requirements of the Bank as determined by the underlying business strategy and the minimum requirements of the State Bank of Pakistan (SBP). The Capital Management process is governed by the Bank's Asset & Liability Committee (ALCO), Risk Management Committee (RMC) and Management Committee (BRMC). Further, capital adequacy and management is overseen by the Board's Risk Management Committee (BRMC) and Strategic Planning and Monitoring Committee (SPMC).

#### Bank's capital management seeks:

- to comply with the capital requirements set by the regulators and comparable to the peers;
- to actively manage the supply of capital costs and increase capital velocity;
- to increase strategic and tactical flexibility in the deployment of capital to allow for the timely reallocation of capital;
- to improve the liquidity of the Bank's assets to allow for an optimal deployment of the Bank's resources;
- to protect the Bank against unexpected events and maintain strong ratings;
- to safeguard the Bank's ability to continue as a going concern so that it can continue to provide adequate return to shareholders;
- availability of adequate capital (including the quantum) at a reasonable cost so as to enable the Bank to expand; and
- to achieve low overall cost of capital with appropriate mix of capital elements.

Bank through Internal Capital Adequacy Assessment Process (ICAAP) and Advance Stress Testing assesses overall capital adequacy on a periodic basis in relation to Bank's risk profile. Utilizing sensitivity and stress analysis techniques, Bank assesses adequacy of Bank's total capital against adverse shocks with respect to credit risk, market risk, operational risk, concentration risk, interest rate risk, liquidity risk, country risk, reputational risk and strategic risk. Further, Bank formulates its strategy, including assessment for raising additional capital for maintaining adequate capital under stressed conditions.

#### 1.1.2 Externally imposed Capital Requirements

In order to strengthen the solvency of Banks / Development Financial Institutions (DFIs), State Bank of Pakistan through its BSD Circular No. 07 of 2009 dated April 15, 2009 prescribed the Banks to raise their minimum paid up capital to Rs. 10 billion free of losses.

State Bank of Pakistan through its BPRD Circular # 6 of 2013 dated August 15, 2013 has required Banks to maintain the minimum Capital Adequacy Ratio (CAR) of 12.5% inclusive of Capital Conservation Buffer (CCB) of 2.5% on standalone as well as on consolidated basis. However, to support the banking sector in extending financing or credit facilities to their customers during COVID-19, State Bank of Pakistan vide BPRD Circular # 12 of 2020 has relaxed CAR requirements to 11.5% by reducing the Capital Conservation Buffer (CCB) from 2.5% to 1.5% till further instructions.

The Paid up Capital and Capital Adequacy Ratio (CAR) of the Bank stood at Rs. 11.451 billion and 22.32% of its total risk weighted assets (RWA) as at December 31, 2021 respectively.

The Bank has complied with all externally imposed capital requirements as at year end.

#### 1.1.3 Scope of Applications

The Basel Framework is applicable to the Bank both at the consolidated level (comprising of wholly owned subsidiary - ABL Asset Management Company Limited) and also on a stand alone basis.

#### 1.1.4 Capital Structure - Basel III transition

State Bank of Pakistan vide BPRD circular # 6 dated August 15, 2013 revised and updated Basel II Framework in accordance with Basel III capital reforms and clarifications to further strengthen capital related rules.

#### Bank's regulatory capital is analyzed into two tiers:

Tier 1 capital, which includes fully issued, subscribed and paid up capital, balance in share premium account, reserve for bonus issue, general reserves as per the financial statements and net un-appropriated profits, etc. after regulatory deductions.

Tier 2 capital, which includes general provisions for loan losses (up to a maximum of 1.25 % of credit risk weighted assets), reserves on the revaluation of fixed assets and equity investments and subordinated debt. Bank has also implemented full standards of Basel III with respect to capital deductions as per road map laid down by State Bank of Pakistan through BPRD Circular # 6 dated August 15, 2013.

The required capital is achieved by the Bank through:

- (a) enhancement in the risk profile of asset mix at the existing volume level;
- (b) ensuring better recovery management; and
- (c) maintaining acceptable profit margins.

# 1.2 Leverage Ratio

The leverage ratio of the Bank as on December 31, 2021 is 3.91% (2020: 5.07%). The ratio has been computed as per State Bank of Pakistan Instructions for Basel III Implementation.

As on December 31, 2021; total Tier 1 capital of the Bank amounts to Rs. 97,235,663 thousands (2020: Rs. 93,659,434 thousands) whereas the total exposure measure amounts to Rs. 2,488,085,909 thousands (2020: Rs. 1,847,990,820 thousands).

Detail of the Bank's eligible capital is as follows:

December 31,	December 31,
2021	2020

## 1.7 Credit risk - General disclosure

The Bank is following standardized approach for all its Credit Risk Exposures.

Under standardized approach, the capital requirement is based on the credit rating assigned to the counterparties by the External Credit Assessment Institutions (ECAIs) duly recognized by SBP for capital adequacy purposes. In this connection, the Bank utilizes the credit ratings assigned by ECAIs and has recognized agencies such as PACRA (Pakistan Credit Rating Agency), JCR-VIS (Japan Credit Rating Company – Vital Information Systems), Fitch, Moody's and Standard & Poors which are also recognized by the SBP.

### 1.7.1 Mapping to SBP Rating Grades

The selected final ratings for all exposures need to be translated to the standard rating grades given by the SBP. In this regard, the mapping tables to be used for converting ECAI ratings to SBP rating grades are given below:

### Long – Term Rating Grades Mapping

SBP Rating grade	Fitch	Moody's	S & P	PACRA	JCR-VIS

#### 1.7.2 Credit Risk: Disclosures with respect to Credit Risk Mitigation for Standardized Approach

The Bank has adopted the Simple Approach of Credit Risk Mitigation for the Banking Book. Since, the trading book of the Bank only comprises of equity investments and units in open ended mutual funds, therefore no Credit Risk Mitigation benefit is taken in the trading book. In instances where the Bank's exposure on an obligor is secured by collateral that conforms with the eligibility criteria under the Simple Approach of CRM, then the Bank reduces its exposure under that particular transaction by taking into account the risk mitigating effect of the collateral for the calculation of capital requirement i.e. risk weight of the collateral instrument securing the exposure is substituted for the risk weight of the counter party.

The Bank accepts cash, lien on deposits, government securities and government guarantees etc. under the simple approach of Credit Risk Mitigation. The Bank has in place detailed guidelines with respect to valuation and management of various collateral types. In order to obtain the credit risk mitigation benefit, the Bank uses realizable value of eligible collaterals to the extent of outstanding exposure.

#### 2 Liquidity Risk

Liquidity Risk is the risk that the Bank is unable to fund its current obligations and operations in the most cost efficient manner. Bank's BOD has delegated the responsibility to ALCO for ensuring that Bank's policy for liquidity management is adhered to on a continual basis. ALCO uses gap analysis based on "maturity schedule" to assess Bank's liquidity risk and devise strategies accordingly. Bank also has in place triggers and limits to monitor liquidity risk on a periodic basis and uses stress testing & scenario analysis to assess adequacy of Bank's liquid assets. Bank also complies with SBP's instructions on Liquidity Standards as prescribed under the Basel III Framework.

#### 2.1 Liquidity Coverage Ratio

The purpose of this disclosure is to provide the information pursuant to Basel III Liquidity Standards issued under BPRD circular # 08 dated June 23, 2016. This supplements the disclosure in the Risk Management sections as well as related information in the Notes to the Financial Statements. This public disclosure should be read in conjunction with the Bank's Financial Statements as of December 31, 2021.

The Liquidity Coverage Ratio "LCR" ensures that Allied Bank Limited (the "Bank") maintains sufficient unencumbered High-Quality Liquid Assets ("HQLA") to survive a significant liquidity stress scenario over a 30-day horizon. LCR reporting to SBP commenced from January 31, 2017 on a monthly basis. Minimum requirement was set at 90% as of December 31, 2017 and 100% from December 31, 2018.

#### Liquidity Management Framework

Daily Liquidity Management is carried out centrally by the Asset and Liability Management ("ALM") Desk in Treasury Group which regulates the day-to-day Liquidity needs of the Bank. Funding and Liquidity Management Strategies are regularly discussed during Asset and Liability Committee "ALCO" meetings. Such discussions include analysis on composition of Deposits and tenure, Funding Gaps and Concentration, monitoring of Short and Long-term Liquidity Ratios (including LCR and NSFR). The Bank utilizes internal Management Action Triggers and Limits which act as early warning indicators and safeguards to ensure sufficient liquidity buffers at all times. Additionally, external and internal liquidity stress tests are performed to evaluate available liquidity under a range of adverse scenarios and to identify potential vulnerabilities in portfolios. The Bank also has in place contingency funding plans that identify specific management action that can be invoked in times of liquidity crisis.

#### Funding Sources & Drivers of LCR

The Bank holds a funding base that is driven by Current and Savings Account "CASA" and Term Deposits from retail, affluent and corporate customers. This is complemented by wholesale funding from operational & non-operational deposits held by commercial clients of the Bank and funding from interbank market. Bank's LCR is sensitive to changes in (a) balance sheet movements resulting from retail, commercial and corporate loan/deposits activities as well as inter-bank borrowing and lending; (b) maturity movements in the balance sheet and balances falling into and out of the 30-day tenor; (c) HQLA movements driven by changes in Government Securities and Balances held with SBP.

#### Liquidity Risk Mitigation Techniques

The Bank uses the following tools to identify and mitigate Liquidity Risk:

- Gap Analysis
- Liquidity Ratios
- Liquidity Stress TestingLiquidity Contingency Plan
- Liquidity Contingency I
- Risk Control Limits

# Composition of High Quality Liquid Assets ("HQLA")

The Bank holds an adequate portfolio of HQLA that are available to meet the Liquidity needs under Stress Scenarios. The HQLA comprise primarily of Level 1 securities in the form of Cash and Treasury Balances, Unencumbered Fixed Income Securities issued by Government of Pakistan in local currency and Foreign Currency Debt securities issued by Government of Pakistan. Level 1 securities are included at 100% of their Market Value in the portfolio of HQLA. Level 2A Assets consist of marketable Securities held with a 20% risk weight under Basel Framework Standardized Approach for Credit Risk, whereas level 2B Assets include marketable Corporate Debt Securities and Non-Financial Common Equity Shares. Level 2A and 2B securities are subject to weights of 85% and 50% as prescribed by the LCR rules.

#### Currency Mismatch

The Bank predominately operates in the Pakistani Rupee. FCY exposures are maintained within pre-defined thresholds and liquidity for each Foreign Currency is managed by utilizing Interbank Market through currency swaps.

### **Derivative Exposures**

Derivative flows comprise mainly of Foreign Exchange flows driven by swaps, forwards and spots. Such derivative positions are marked-to market in the computation of net outflows.

#### **Ouantitative Disclosure**

The data presented in the Quantitative Disclosure is a simple average of quarterly LCRs, wherein quarterly LCR is a simple average of monthly observations. Bank's average LCR during the year 2021 was 186.17%. In the Q1'2021, Bank's averaged LCR was 209.3%. The average LCR decreased in the Q2 to 191.5% due to decrease in HQLA. Averaged LCR for Q3'2021 increased to 197.9% due to increase in HQLA and in Q4, LCR decreased to 154.6%. In all quarters, Bank's LCR remained well above the regulatory minimum requirement of 100%.

\* Unweighted values are calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

\*\* Weighted values are calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates (for inflows and outflows).

### 2.2 Net Stable Funding Ratio

Net Stable Funding Ratio "NSFR" ensures that Allied Bank Limited reduces funding risk over a longer time horizon by requiring banks to fund their activities with sufficiently stable sources of funding in order to mitigate the risk of future funding stress. NSFR reporting to SBP commenced from March 31, 2017 on a quarterly basis. Minimum requirement is set at 100%, effective from December 31, 2017 onwards.
